

Our VFX shader allows you to create **professional** and **unique** explosions.

You can load various textures, and enable or disable various effect elements.

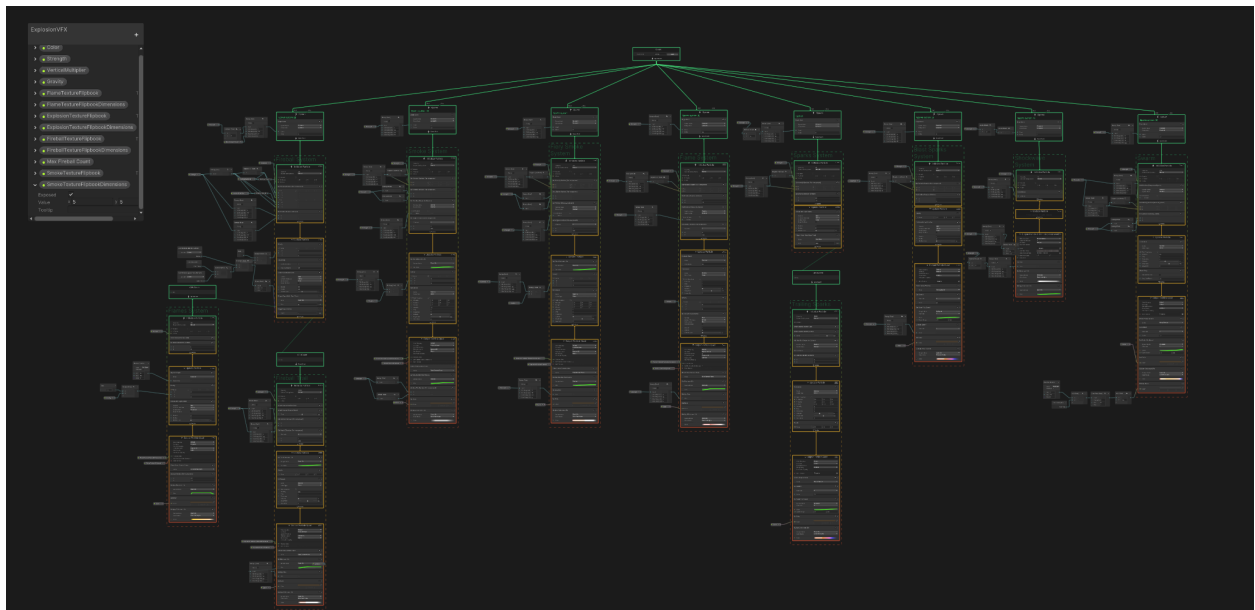

Also, the shader allows you to control various parameters such as **Intensity**, **gravity**, **color**, and others.

If you need to change the special effect, you can click on the **"Edit"** button.

However, be **careful**, your changes will affect the VFX effect.

If you have any trouble with this product, please contact us via email at -
